

Premium Lawn Food Plus 24-0-3 Fertilizer with 40% PCU, 60% Regain, 25% Ammonium Sulfate, 12% Earth-Friendly Biosolids, 1% Iron, & Micronutrients

- PCU (Poly Coated Urea) and Regain® formulated nitrogen provides thick, lush, green turf for up to 14 weeks with very little burn potential
- Great Spring and Summer fertilizer
- Apply late Spring, Summer, and/or early Fall
- Topcut biosolids add natural slow-release nitrogen with non-staining iron for dark green grass
- Added iron and micronutrients will keep grass green during hot, dry summer months
- Excellent color for longer periods
- Spreader charts on every bag

A 50lb. bag treats 12,500 square feet on turfgrass.

A 20lb. bag treats 5,000 square feet on turfgrass.

*Endure uses a uniform particle size for improved spread pattern and coverage. Uniform coverage provides even green color and more effective herbicide control. Spreader charts are on each bag. Turfgrass needs fed every six to eight weeks during the growing season.

*All phosphates have been removed from the Endure maintenance products keeping our environmental concerns in mind. Newly seeded turf should be fertilized with Endure 10-20-8 Starter Plus Earth-Friendly Organics at the time of planting. 10-20-8 Starter Plus can be used anytime a soil test result recommends additional phosphate to improve soil conditions.
