- **Premium** 19-0-3 or **Value** 14-0-3

### Liquid Broadleaf Weed Spray
**We recommend PBI Gordon® products such as Trimec® Classic, Trimec® 992 or Speedzone®**

---

**We recommend BreedTurf**
grass seed for a beautiful lawn
What’s the big deal about UMAXX™ and UFLEXX™? With the high cost of nitrogen these days, it only makes sense to improve your nitrogen efficiency. UMAXX™ and UFLEXX™ stabilized nitrogen does just that by combining a urease inhibitor and a nitrification inhibitor with urea. This reduces nitrogen loss from volatility, leaching and denitrification. The result is a steady source of nitrogen with less burn potential and steady growth with exceptional color. UMAXX™ stabilized nitrogen will continue to feed lawns for 16-18 weeks depending on soil conditions, while UFLEXX™ stabilized nitrogen will feed for 10-12 weeks.
